How Do You Show What's Happening?

Proudly manufactured in Macedon, NY

About Magnatag

With over 500,000 visible magnetic board systems sold worldwide, we have a tremendous base of knowledge and experience helping people visibly share information around the clock. We'll listen carefully when you contact us, help answer your questions, and get you exactly the solution you need. This has been our specialty for half a century, and we know how to do it right the first time. You won't find our products or their features anywhere else. We're here whenever you need us.

About the MagnaLux® Surface

- Our proprietary MagnaLux® dry erase surface is made with quality steel and our one-of-a-kind enamel formula. Together, this pairing creates a dry erase surface that offers superior magnetism and erasability that can only be found in a Magnatag® whiteboard. Unlike other melamine/fiberboard products, our whiteboard formula has been perfected to give us the ability to print any image directly into the surface of the board. In addition, MagnaLux® whiteboards are built with stress skin structural technology to ensure that our boards will not bow or warp over time. Every square inch of the MagnaLux® surface is adhered to a honeycomb core and aluminum backer, which provides the primary user with a completely flat structural writing surface.

- Meets ASTM E-84 with a Class A fire rating based on following results: Flame spread – 0; smoke developed – 50

FabricTack® and CorkTack™ Options

- We offer a selection of 6 densely woven FabricTack® options or cork bulletin boards. Make a statement about the quality and efficiency of your organization when you use these boards to neatly display your documents, announcements, and notices. carefully packaged and shipped with all the supplies needed to use them.
