THE VISUGLASS® DIFFERENCE

OTHERS USE *THIS*

WE USE *low iron, crystal clear* glass for bright whites and *high definition* prints

PRECISION POLISHED EDGE

All of our glass boards are quarter-inch thick, with an elegant, polished beveled edge and aluminum substructure for rigidity.

1. Features & Benefits

Vivid Writing Surface.

- Optically clear low lead tempered glass with a bright white coloring makes your words and sketches seem to come alive as you write on the board.

No green tint, no cloudy look.

- VisuGlass® shows marker colors noticeably better than other writing surfaces.

No sag design.

- Most glass boards are flexible and bow in the middle making it awkward to write on them. VisuGlass® has a unique construction and rigid structural hanging system to keep them flat and easy to write on.

Unique Substructure.

- You find that when glass is in large sheets it is rather flexible. Many glass board companies offer standoffs at all four corners. This setup will result in the board flexing as you write on it. Our unique substructure keeps your board sturdy as you write on it and allows for easy install.

Simple and Secure Installation.

- The steel backer and hidden frame system ensures VisuGlass® will install quickly and securely without additional reinforcement or damage to your wall surface. Finished edges—no visible and ugly mounting hardware.

Permanent Pen & Eraser Holder.

- No flimsy add-on marker and eraser holder—your choice of hidden or attractive front side pen/eraser dock.

All the advantages of regular glass boards.

- No ghosting or staining
- Will not fade over time
- Works with a variety of markers
- No scrubbing, carefree easy-to-clean maintenance

Worry-Free Shipping.

- Rugged tempered glass and custom glass packaging mean no worries about shipping and delivery.

Made in the USA.

- Manufactured and shipped from our factory in Macedon, NY.
- Complete details at magnatag.com/VIG

2. Additional Options

Satin Anodized 6063 T-5 Tempered Aluminum Frame

- Etched Polished Blue Pewter
- Etched Polished Brass
- Etched Polished Copper
- Etched Polished Gunmetal
- Etched Polished Stainless

Color Options

- Glass boards are statement pieces—12 standard color options to choose from.

Printed Systems

- 7 standard printed systems available with the added option of creating something custom.

3. Easy-Installation

- Our glass boards are very easy to install. The unique substructure and mounting system allow you to easily mount your glass board either flush or with a 1-inch offset from the wall. It only takes two people with a level and a drill to easily install any of our glass boards.
- Installation instructions can be found on magnatag.com/VIG
