How Do You Show What's Happening?

Proudly manufactured in Macedon, NY

About Magnatag

With over 500,000 visible magnetic board systems sold worldwide, we have a tremendous base of knowledge and experience helping people visibly share information around the clock. We'll listen carefully when you contact us, help answer your questions, and get you exactly the solution you need. This has been our specialty for half a century, and we know how to do it right the first time. You won't find our products or their features anywhere else. We're here whenever you need us.

Why Magnatag?

Magnatag® Specialty Products are easy to order, easy to install, come in standard and custom sizes, are made to order on a short lead time and they are built to last.

Our MagnaLux® Porcelain-like Steel Whiteboard Surface is Field Proven.

- Over 50 years of testing and perfecting our MagnaLux® formula we can confidently say that it's like no other, when it comes to erasability and printing performance. Our surface is field proven. It stands up to thousands of writes and erases in high-use environments such as hospitals, schools and factories. It will not stain, crack or fade over a lifetime of daily use. Unlike other whiteboards, our enamel surface is evenly applied to a steel sheet giving our Magnalux® surface it's superior magnetism.

Our boards can be permanently heat-fused printed.

- Our heat fused printing process gives us the ability to print high definition images directly into the surface of our dry-erase enamel. Our boards are printed using a blend of heat and pressure to fuse the lines, lettering and full color images into the board surface. This allows us to produce a high definition, permanently printed whiteboard. With **no laminates or overlays** that will fail over time.

We build our products to order. We control the quality, configuration and timely delivery of everything we sell.

- Each board system is manufactured at our factory in Macedon NY. They are assembled and tested, then carefully packaged and shipped with all the supplies needed to use them. Ready to go right out of the box.

MagnaLux® Framed Magnetic Dry-Erase Whiteboards

1. Features

- Magnalux® Porcelain-Like Steel Markerboards

INSTALLATION

Safety Hooks
- Bail hangers are fastened on the back of the whiteboard every 16 inches to correspond to standard frame construction. Fasten Safety Hooks to wall studs at the desired height and loop bail hangers over hooks to mount your whiteboard.

FrameKlamps™
- This option allows fine tuning your whiteboard location left to right when wall studs are not in an ideal location for board mounting. Once your board is in the desired location simply rotate the lever on the FrameKlamps™ to lock your whiteboard in position.
- FrameKlamps™ fasten top and bottom of board tightly to the wall and can be mounted horizontally or vertically.
ADDITIONAL OPTIONS

PrivateEye™ Privacy Screen & Mounting Clips
- Keeps sensitive information out of plain sight
- Covers boards up to 8' wide and 4' high
